ABOUT ME

I'm passionate and enthusiastic about mobile app development (especially for iOS). I always place UI/UX as a high priority. I believe that design is the most valuable component of ANY product. I embrace challenges and enjoy coming up with innovative ways to solve them. I take pride in being self-taught, self-motivated and not afraid to fail.

SKILLS SUMMARY

- Expertise in Swift (1./1.2/2.)

- Working with Parse(DB, Push Notification),Realm(Local DB) and FireBase/PubNub - Real time communication

- A keen eye for crafting smart user experiences and modern user interfaces

- Advanced Auto Layout:

  * Creating state-of-the-art user interfaces and screen compatibility between all devices.

  * Evolving animations and gestures within (and outside) Auto Layout to maximize user experi ence.

- Working with REST APIs (Instagram Oauth, Twitter Oauth, Google Translate and more)

- Working with external DBs, fetching/sending and manipulating data

- Deep understanding of UIKit,Core-animation,NSURLSession,NSOperation Address Book Kit, Social Kit,AVFoundation, Core Image, StoreKit and lots more.

- Tuned and focused on the latest iOS and xCode features

- Clean, maintainable, performant code.

- Third-party SDKs (Admob, Chartboost, Facebook, Startapp and lots more)
